

POWERING THE FUTURE

C-band Pan-American Downlink Coverage

Ku-band 1 Downlink Coverage

KEY MARKETS

- Alaska
- Canada
- Continental United States
- Mexico
- South America, Central America and the Caribbean

KEY SERVICES

- DTH
- Broadband applications
- Cellular backhaul
- Mobility services
- Occasional services and special events
- Social projects and government services

SATELLITE

Satellite Manufacturer
Boeing Defense and Space

Launch
01/03/2015

Projected lifetime
> 15 years

Orbital position
114.9 degrees West

Frequencies
C-band, Ku-band

Ku-band 3 South American Downlink Coverage

New capacity in Ku and C-band for the Americas

Located at 114.9° West, EUTELSAT 115 West B extends our satellite coverage from Alaska and Canada down to South America, with unique coverage over the Galapagos and Easter Island.

Ku-band resources, connected to three fixed beams covering the Americas from Alaska to Patagonia, provide optimised regional coverage of Canada, Mexico and South America for high-growth data services including broadband access, government connectivity and corporate networks. Video services include Occasional Use capacity, DTH and DTT.

A semi-hemispheric C-band beam provides groundbreaking coverage from Alaska to Peru. This is optimised for services including mobility, cellular backhaul and trunking, video distribution and government services.

The EUTELSAT 115 West B satellite is of particular interest to ISPs, aeronautical, maritime, oil & gas, telecom operators and government agencies, as well as news, sports & entertainment broadcasters.

Manufactured by Boeing Defense and Space, EUTELSAT 115 West B is the first all-electric satellite of our fleet.
